ELSEVIER

Journal of Statistical Planning and Inference 67 (1998) 343–344

journal of statistical planning and inference

Author Index Volume 67 (1998)*

Abt, M., N. Gaffke, E.P. Liski B.K. Sinha, Optimal designs in growth curve models – II Correlated model for quadratic growth: optimal designs for parameter estimation and growth prediction (2) 287–296
Bain, L.J., *see* G. Gan (1) 85– 97
Berger, Y.G., Rate of convergence to normal distribution for the Horvitz–Thompson estimator (2) 209–226
Buzas, J.S., Unbiased scores in proportional hazards regression with covariate measurement error (2) 247–257
Cao, R., *see* M.C. Rodríguez-Campos (1) 99–122
Cavanaugh, J.E. and R.H. Shumway, An Akaike information criterion for model selection in the presence off incomplete data (1) 45– 65
Chan, S. and M. Ghosh, Orthogonal projections and the geometry of estimating functions (2) 227–245
Cobbers, H. and U. Kamps, A note on characterizations of the geometric distribution (2) 187–190
Cuesta-Albertos, J.A., A. Gordaliza and C. Matrán, On the geometric behaviour of multidimensional location measures (2) 191–208
Gaffke, N., *see* M. Abt (2) 287–296
Gan, G. and L.J. Bain, Some results for type I censored sampling from geometric distributions (1) 85– 97
Ghosh, M., *see* S. Chan (2) 227–245
Gomaby, E. and M. Hušková, Rank based estimators of the change-point (1) 137–154
González-Manteiga, W., *see* M.C. Rodríguez-Campos (1) 99–122
Gordaliza, A., *see* J.A. Cuesta-Albertos (2) 191–208
Gutierrez-Peña, E. and A.F.M. Smith, Aspects of smoothing and model inadequacy in generalized regression (2) 273–286
Hsu, J.C., *see* D.T. Voss (2) 297–309
Hu, I., Strong consistency of Bayes estimates in nonlinear stochastic regression models (1) 155–163
Hušková, M., *see* E. Gombay (1) 137–154
Jacroux, M., On the determination and construction of E-optimal block designs in the presence of linear trends (2) 331–342
Kamps, U., *see* H. Cobbers (2) 187–190
Lee, S., The asymptotic behavior of the empirical process based on a linear process under some contiguous alternatives (1) 1– 15
Lee, S., On the quantile process based on the autoregressive residuals (1) 17– 28
Linssen, H.N., *see* E.E.M. van Berkum (2) 167–186
Liski, E.P., *see* M. Abt (2) 287–296
Lloyd, C.J., Improved efficiency for recapture studies from auxiliary experimentation (1) 29– 44
Mammen, E. and B.U. Park, Erratum to "Optimal smoothing in adaptive location estimation" [J. Statist. Plann. Inference 58 (1997) 333–348] (1) 165
Matrán, C., *see* J.A. Cuesta-Albertos (2) 191–208
Overdijk, D.A., *see* E.E.M. van Berkum (2) 167–186
Pan, G. and T.J. Santner, Selection and screening procedures to determine optimal product designs (2) 311–330
